Jeff Ong

Principal Software Developer – Toronto, Canada
jeff-ong.com | arcpx.com | jeff-ong@outlook.com

Profile

I am a Software Developer with a background in engineering and marketing, focused on developing solutions with compelling user experiences and meaningful impact. I am experienced in building pipelines that bridge technical solutions with business opportunities, defining scopes, identifying value, aligning key stakeholders, and bringing products to users.

Experience

Jam3 -> Monks | Principal Software Developer | 2025 - Present

- Fine-tune LoRA weights to generate creative assets for marketing campaigns.
- Design and develop a serverless architecture to streamline CI/CD and SDLC processes.
- Lead a team of full-stack developers to build internal tooling, define ontologies, and develop POCs for new business opportunities.
- Create and maintain technical design documentation and architectural diagrams.
- Automate context-engineering agents to improve observability by 30%.

Amazon | Principal Software Developer | 2024 - 2025

- Organized workshops with clients to analyze user flows, identify gaps, and define problem statements.
- Automated the brand review and approval system to enforce strict compliance and improve efficiency.
- Supervised a team of data scientists and software engineers to develop a knowledge-base layer.
- Guided cross-functional teams to achieve KPIs and business metrics.

Meta | Senior Software Developer | 2018 - 2024

- Partnered with the WhatsApp.com engineering team to overhaul software infrastructure and automate the migration process to increase productivity and reduce costs.
- Designed a CMS to streamline site reliability and content management processes.
- Developed an asset management platform to improve brand communication.
- Improved permission management with a custom role-based access control extension.

[Contract] Anomaly Games | UX Consultant | 2024 - 2025

- Supervised end-to-end UX/UI development for a prediction market platform, defined user journeys, and ensured high usability.

[Contract] MirrorMe3D | UI Engineer | 2024 - 2025

- Designed and developed a WebGL 3D analysis platform to manage pre-operative facial scans.
- Developed a design system from scratch to handle special use cases for clinical operations.

Skills

ML: LoRA Training, LLMOps, Agent Orchestration and Evaluation, Semantic Search, Vectorization
Front-end: Atomic System Design, Composition, Design System, Iconography
Back-end: AWS, GCP, Docker Containerization, SQL, Postgres, Cloud Computing, Knowledge Graph
Languages: Python, TypeScript, JavaScript, Cypher, Node.js, Go

Education

Media Communications - Humber College - 2014 | Computer Application Programming - TMU - 2019 | AWS Certified AI Practitioner - 2025
